

Cancer Research Project Criteria

Task: Your job is to research the specific form of cancer you were assigned or picked. When completed, you will present your information in the form of a brochure or a double sided facts sheet. Your finished product must include the following components:

- two color pictures or diagrams representing the following:
 - a histological representation = cells and tissues
 - a gross anatomical representation = organs and systems
- An Introduction to your form of Cancer that includes at least 2 stats.
- The symptoms associated with your form of cancer; can be a bulleted list however, terms that are not common knowledge should be explained.
- Information and an explanation on how your form of cancer is diagnosed.
- Information on the available treatments used and their rate of success and drawbacks.
- Information on the patient's prognosis. What is their life going to be like and what are their chances of survival and or of a reoccurrence?

In Addition:

- your information must be cited including your pictures/diagrams
- your product should be visually appealing to attract readers
- correct anatomical terms should be used
- it should be written so that it can be understood by the general public
