

Using Model Organism

E. Coli research Included:

- What : identification and description of organism 2 points
- Why: importance of the model organism for research 2 points
- When: information on the history of the organism/first used 2 points
- Information presented was detailed; additional information provided 5 points
- Information presented was detailed 3 points
- Information presented lacked details 1 point

S. cerevisiae research Included:

- What : identification and description of organism 2 points
- Why: importance of the model organism for research 2 points
- When: information on the history of the organism/first used 2 points
- Information presented was detailed; additional information provided 5 points
- Information presented was detailed 3 points
- Information presented lacked details 1 point

N. crassa research Included:

- What : identification and description of organism 2 points
- Why: importance of the model organism for research 2 points
- When: information on the history of the organism/first used 2 points
- Information presented was detailed; additional information provided 5 points
- Information presented was detailed 3 points
- Information presented lacked details 1 point

C. elegans research Included:

- What : identification and description of organism 2 points
- Why: importance of the model organism for research 2 points
- When: information on the history of the organism/first used 2 points
- Information presented was detailed; additional information provided 5 points
- Information presented was detailed 3 points
- Information presented lacked details 1 point

D. melanogaster research Included:

- What : identification and description of organism 2 points
- Why: importance of the model organism for research 2 points
- When: information on the history of the organism/first used 2 points
- Information presented was detailed; additional information provided 5 points
- Information presented was detailed 3 points
- Information presented lacked details 1 point

D. rerio research Included:

- What : identification and description of organism 2 points
- Why: importance of the model organism for research 2 points
- When: information on the history of the organism/first used 2 points
- Information presented was detailed; additional information provided 5 points
- Information presented was detailed 3 points
- Information presented lacked details 1 point

A. thaliana research Included:

- What : identification and description of organism 2 points
- Why: importance of the model organism for research 2 points
- When: information on the history of the organism/first used 2 points
- Information presented was detailed; additional information provided 5 points
- Information presented was detailed 3 points
- Information presented lacked details 1 point

- Literature was correctly cited 5 points
- Literature was incorrectly cited 3 points
- Literature was not cited 0 points

Possible points = 82

Points 100% = 75

Points Earned _____ / 75

Score:
