March 30 – April 3, 2020

## Distance Learning – Week 2

### ***Edvotek # 337 Drosophila Genetics Using PCR***

Your Assignment for this week is to complete your Laboratory Report using the data you collected when we conducted the lab in class.

Materials needed are found on the Class Weebly site. Documents are located under the Model Organisms Tab in the Drosophila Section. There you will find the following:

- Gel data with a centimeter ruler
- Lab SOP student manual
- Troubleshooting Guide
- Lab Questions
- Report Criteria
- Report Rubric

Since this assignment is something we were working on when we left it should be almost completed. Therefore, it will be due this Friday April 3, 2020.
